Gatehouse Financial Group Limited

Chairman's Statement for the Year Ended 31 December 2025

In the name of Allah, the Most Gracious, the Most Merciful, on behalf of the Board of Directors of Gatehouse Financial Group Limited ("the Group"), I present the 2025 Annual Report and Financial Statements.

Gatehouse Financial Group's financial performance in 2025 is tied to that of Gatehouse Bank ("the Bank"), which, as of 31 December 2025 was the Group's only operating subsidiary. The Bank's loss after tax for 2025 was £11.4 million and, subsequently, Gatehouse Financial Group's incurred loss after tax amounted to £11.5 million in 2025 (profit after tax of £3.6 million in 2024).

Whilst the Bank recorded its first annual loss in six years, it is important to note the context. The sale of its Build to Rent subsidiary, which was initially budgeted for in 2025, was unfortunately delayed and completed in Q1 2026. In addition, challenging market conditions resulted in a further provision for loss of £2.5 million on the Bank's small legacy commercial portfolio. Excluding these two events, its performance in 2025 would have ensured continued profitability. Going forward, the Board-approved strategic plan will result in greater emphasis on portfolio recycling to maximise profit and capital efficiency.

In light of these challenges, Gatehouse Bank managed its origination capability in line with capital, while focusing on upholding an excellent level of service for its customers. To help drive efficiencies and streamline the customer journey, the Bank invested significantly in new systems and technology, including an underwriting system that is currently in development and piloting an AI-enhanced RICS surveyor expertise platform. I am proud that the hard work of the Bank and its colleagues continued to be recognised, not only through industry accolades, but also and most importantly by its customers, with the average all-Bank net promoter score (NPS) standing at a strong +68 for 2025.

Despite the challenges faced, Gatehouse Bank continued to deliver on its commitment to offer ethical Islamic finance products to help customers achieve their financial goals. In April, the Bank re-entered the higher finance-to-value (FTV) market by introducing a range of Home Purchase Plans (HPP) offering up to 95% FTV to UK customers, to help first-time buyers and others with smaller deposits get on the property ladder. Having identified a key barrier to entry for overseas buyers in the UK's home finance market, Gatehouse Bank also entered a new partnership with financial technology firm, Algbra, through which eligible customers are now offered the opportunity to apply for a UK payment account as part of the home finance process.

In line with business strategy, Gatehouse Bank's total home finance portfolio grew from £1.168 billion in 2024 to £1.186 billion in 2025, also continuing to originate off balance sheet, as per the terms of the agreement with its forward flow partner, contributing to total gross completions of £245 million.

The Bank's range of ethical savings products is underpinned by its Woodland Saver accounts, for which a tree is planted on the customer's behalf for every account opened or renewed. It is fantastic to see that this tree-planting initiative continues to resonate strongly with Gatehouse Bank's customer base, with over 80% of those surveyed consistently highlighting tree planting as a key driver in their decision to open a Woodland Saver account. In 2025, the Bank surpassed the milestone of 70,000 trees planted since the launch of the accounts in 2021. In line with the home finance targets for the year, total savings deposits remained stable, at £1.287 billion, compared to £1.289 billion in 2024.

In the institutional Build to Rent sector, Gatehouse Bank continued to deliver through its subsidiary, the Gatehouse Build to Rent Group, trading as Gatehouse Living Group (GLG). GLG holds a robust track record in the market, having invested over £1 billion in single-family rental homes, delivered over 5,000 homes nationwide and established five institutional single-family rental platforms. In 2025, the Bank engaged in conversations with investors over the planned sale of GLG, which was finalised in early 2026.

2025 marked the first full year of implementation of the Bank's ESG strategy, which comprises of four key pillars: biodiversity and deforestation, financial education and inclusion, climate change and community health and wellbeing. Colleagues across Gatehouse Bank continued to engage with ESG initiatives, with 80% taking part in volunteering activities, fundraising for charity partner, Depaul UK and/or nominating a grassroots sports team to take part in the Bank's community sports fund programme.

Looking towards the future, I am confident that Gatehouse Bank's streamlined operations, enhanced efficiencies and the continued appetite for its products have placed the Bank in a favourable position to fulfil its growth potential.

Gatehouse Financial Group Limited

Chairman's Statement for the Year Ended 31 December 2025

I look forward to continuing to work closely with the Board of Directors in the coming year and would like to thank our Shareholders, Directors, Shariah Supervisory Board and all colleagues for their continued hard work and dedication.

.....
Fahed Faisal Boodai
Chairman
11 May 2026

Gatehouse Financial Group Limited

Shariah Supervisory Board Report for the Year Ended 31 December 2025

SHARIAH SUPERVISORY BOARD REPORT
بسم الله الرحمن الرحيم

To the Shareholders of Gatehouse Financial Group Limited
Assalaam A'laikum Wa Rahmat Allah Wa Barakatuh

In compliance with our terms of appointment with Gatehouse Financial Group Limited ("GFG"), we, the Shariah Supervisory Board (the "SSB"), are required to submit the following report of Shariah compliance to you in connection with the business activities and the operations of GFG and its subsidiaries (the "Group").

In connection with our mandate, we have reviewed all material transaction documents that were presented to us and we also relied on certification of Shariah compliance issued by the respective Shariah Supervisory Boards of the subsidiaries within the Group. These include transactional as well as agreements signed with third parties for the purpose of obtaining their services to facilitate the proper operation of the Group. This report relates to the year ended 31 December 2025.

We have conducted overall Shariah review of the Group to form an opinion as to whether the Group has complied with Shariah and with the specific pronouncements, rulings and guidelines issued by us.

Management is responsible for ensuring that the Group conducts its business in accordance with Islamic Shariah. It is our responsibility to form an independent opinion and report to you, based on our overall review of the operations of the Group.

Supervision

The SSB has supervised the Group's operations to the extent it is relevant to Shariah compliance and carried out its role in directing the Group to comply with Shariah and the SSB's Shariah pronouncements.

Group's Contracts

The Group has entered into contracts for its operations and financing agreements. These include obtaining services from third parties to manage the Group and providing financing to clients in a Shariah-compliant manner to generate income. The SSB has reviewed the contracts and agreements presented during the year and conveyed its pronouncements. The Group has followed the pronouncements and, where necessary, amended the relevant documents in order to comply with Shariah.

Shariah Audit

Regular Shariah audits have been carried out of the Group's business activities for the year ended 31 December 2024. The Shariah audit included a review of material transaction documents executed by the Group. In all material respects, the SSB found the business activities of the Group to be in compliance with the principles of Shariah and thanks the management of the Group for adhering to the principles of Shariah.

Balance Sheet

The SSB has reviewed the Group's Balance Sheet, the attached statements therewith and notes complementary thereto. The SSB indicates that the Balance Sheet is within limits of information presented by the Group's management representing the Group's assets and liabilities.

Zakaat

The Group calculates the Zakaat on behalf of its shareholders according to the Shariah rules approved by the Shariah Supervisory Board and was calculated using the Net Invested Funds method. The SSB reviewed the Group's policies on Zakaat which states that the payment out of the shareholders' funds retained with the Group or the Zakaat payable on the Group's paid up capital is the responsibility of the shareholders.

Gatehouse Financial Group Limited

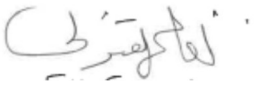

Shariah Supervisory Board Report for the Year Ended 31 December 2025

Conclusions

We performed our review so as to obtain material information including reliance on the certification of Shariah compliance issued by the Shariah Supervisory Boards of the entities within the Group. We sought explanations which we considered necessary in order to provide us with sufficient evidence to give assurance that the Group has not breached the rules and principles of Shariah.

In our opinion, the contracts and agreements, transactions and dealings entered into by the Group for the year ended 31 December 2025 complies with the Islamic principles of Shariah.

DIRECTORS' REPORT

The Directors present their report on the affairs of the Group, together with the financial statements and independent auditor's report, for the year ended 31 December 2025.
For details about going concern and subsequent events, please refer to note 3 and 38, respectively.

Principal Activities

Gatehouse Financial Group Limited ("GFG", the "Group") was incorporated in Jersey on 5 March 2015 and is the holding Company for Gatehouse Bank plc.

Gatehouse Group plc is incorporated in the UK and is authorised by the Prudential Regulation Authority (PRA) and regulated by the Financial Conduct Authority (FCA) and the PRA to act as a deposit-taking institution.

Financial results

The financial statements for the year ended 31 December 2025 are shown on pages 12 to 17. The consolidated Group loss for the year after taxation amounts to £11,540k (2024: profit of £3,649k). The consolidated Group comprehensive loss for the year amounts to £10,694k (2024: profit of £3,254k).

Dividend

No dividends were paid during the year (2024: £nil). The Directors do not recommend a final dividend on ordinary shares to be paid in respect of the year (2024: £nil).

Directors and Directors' Interests in Shares

Below is a table of Directors appointments and resignations during 2025.

Director	Date of Appointment	Date of Resignation
Fahed Faisal Boodai	18 March 2015	
Jasem Abdullah Al Hajry	20 October 2025	
Abdulaziz AlBader	15 February 2017	20 October 2025
Mohamad Tawfik Al-Tahawy	18 March 2015	
Charles Haresnape	15 June 2017	

Zakaat

The Group calculates the Zakaat on behalf of its shareholders according to the Shariah rules approved by the Shariah Supervisory Board. Zakaat calculated for the year ended 31 December 2025 is 0.0130 pence per ordinary share (2024: 0.0149 pence per ordinary share). The responsibility for payment of Zakaat lies with the shareholders of the Group.

Approved by the Board of Directors and signed on behalf of the Board.

Mohamad Tawfik Al-Tahawy
Director
11 May 2026

Gatehouse Financial Group Limited

Statement of Directors' Responsibilities

The Directors are responsible for preparing the financial statements in accordance with applicable law and regulations.

Jersey Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with the UK-adopted International Accounting Standards (IASs). The financial statements are required by Jersey Company law to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year.

In preparing these financial statements, International Accounting Standard 1 requires that Directors present fairly for each financial year the Group's financial position, financial performance and cash flows. This requires the fair representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses. In virtually all circumstances, a fair presentation will be achieved by compliance with all applicable IASs. However, Directors are also required to:

- properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IASs are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- make an assessment of the Group's ability to continue as a going concern.

The Directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies (Jersey) Law 1991. They are also responsible for safeguarding the assets of the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

We confirm that to the best of our knowledge:

The financial statements, prepared in accordance with relevant reporting framework, give a true and fair view of the assets, liabilities, financial results of the Group and the undertakings included in the consolidation taken as a whole;

The Chairman's statement includes a fair review of the development and performance of the business and the position of the Group and the undertakings; and

The annual report and financial statements, taken as a whole, are fair, balanced and understandable and provide the information necessary for shareholders to assess the Group's performance, business model and strategy.

By order of the Board:

Mohamad Tawfik Al-Tahawy
Director
11 May 2026

Independent Auditor's Report to the Members of Gatehouse Financial Group Limited

Opinion

We have audited the financial statements of Gatehouse Financial Group Limited (the 'parent company') and its subsidiaries (the 'group') for the year ended 31 December 2025 which comprise consolidated income statement, consolidated statement of comprehensive income, consolidated statement of financial position, consolidated statement of changes in equity, consolidated statement of cash flows and notes to the financial statements, including material accounting policy information.

The financial reporting framework that has been applied in their preparation is applicable law and UK-adopted international accounting standards and, as regards the parent company financial statements, as applied in accordance with the provisions of the Companies (Jersey) Law 1991.

In our opinion, the financial statements:

- give a true and fair view of the state of the group's affairs as at 31 December 2025 and of the group's loss for the year then ended;
- have been properly prepared in accordance with UK-adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies (Jersey) Law 1991.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the group and the parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's and the parent company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report and financial statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters in relation to which the Companies (Jersey) Law 1991 requires us to report to you if, in our opinion:

- proper accounting records have not been kept, or proper returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- we have not received all the information and explanations that, to the best of our knowledge and belief, was necessary for the audit.

Responsibilities of Directors

As explained more fully in the directors' responsibilities statement set out on page 7, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud.

Based on our understanding of the group and the parent company and their industry, we considered that non-compliance with the following laws and regulations might have a material effect on the financial statements:

regulatory and supervisory requirements from the regulatory authorities where the group and the parent company conducts their business.

To help us identify instances of non-compliance with these laws and regulations, and in identifying and assessing the risks of material misstatement in respect to non-compliance, our procedures included, but were not limited to:

- Inquiring of management and, where appropriate, those charged with governance, as to whether the group and the parent company is in compliance with laws and regulations, and discussing their policies and procedures regarding compliance with laws and regulations;
- Inspecting correspondence, if any, with relevant licensing or regulatory authorities;
- Communicating identified laws and regulations to the engagement team and remaining alert to any indications of non-compliance throughout our audit; and
- Considering the risk of acts by the group and the parent company which were contrary to applicable laws and regulations, including fraud.

We also considered those laws and regulations that have a direct effect on the preparation of the financial statements, such as tax legislation and the Companies (Jersey) Law 1991.

In addition, we evaluated the directors' and management's incentives and opportunities for fraudulent manipulation of the financial statements, including the risk of management override of controls, and determined that the principal risks related to posting manual journal entries to manipulate financial performance, management bias through judgements and assumptions in significant accounting estimates, revenue recognition (which we pinpointed to the accuracy assertion), and significant one-off or unusual transactions.

Our audit procedures in relation to fraud included but were not limited to:

- Making enquiries of the directors and management on whether they had knowledge of any actual, suspected or alleged fraud;
- Gaining an understanding of the internal controls established to mitigate risks related to fraud;
- Discussing amongst the engagement team the risks of fraud; and
- Addressing the risks of fraud through management override of controls by performing journal entry testing.

There are inherent limitations in the audit procedures described above and the primary responsibility for the prevention and detection of irregularities including fraud rests with management. As with any audit, there remained a risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal controls.

A further description of our responsibilities is available on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Independent Auditor's Report to the Members of Gatehouse Financial Group Limited

Use of the audit report

This report is made solely to the company's members as a body in accordance with Section 113A of the Companies (Jersey) Law 1991. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body for our audit work, for this report, or for the opinions we have formed.

Poppy Proborespati (Senior Statutory Auditor)

Gatehouse Financial Group Limited

Consolidated Statement of Cash Flows for the Year Ended 31 December 2025

	Note	Year ended 31 December 2025 £ 000	Year ended 31 December 2024 £ 000
Cash flows from financing activities			
Cash outflow for lease liabilities	26	(267)	(401)
Held for sale financing activities		(40)	(296)
Net cash flows from financing activities		(307)	(697)
Net (decrease)/increase in cash and cash equivalents		(3,336)	3,243
Cash and cash equivalents at 1 January		27,823	24,596
Effect of exchange rate fluctuations on cash held		112	(16)
Cash and cash equivalents at 31 December		24,599	27,823
Additional information on operational cash flows from profit and dividends			
Profit paid		48,829	53,847
Profit received		65,797	65,387
Dividend received		-	659

1 General information

Gatehouse Financial Group Limited (the "Group", the "Company") was incorporated as a private company in Jersey on 5 March 2015 under the Companies (Jersey) Law 1991. The address of the registered office is given on page 1.

Under Article 105(11) of the Companies Jersey Law 1991, the Directors of a holding company need not prepare separate financial statements (i.e. Company only financial statements) if consolidated accounts for the Company are prepared, unless required to do so by the member of the Company by ordinary resolution. The members of the Company had not passed a resolution requiring separate financial statements and, in the Directors' opinion the Company meets the definition of a holding company. As permitted by law, the Company's Board of Directors have elected not to prepare separate financial statements for the Company.

2 Adoption of new and revised standards

New and revised IFRSs in issue but not yet effective

The Group has not applied the following new and revised IFRSs that have been issued but are not yet effective:

New or amended standard or interpretation	Effective date – for annual periods beginning on or after
Amendments to IFRS 7 and 9: Classification and Measurement of Financial Instruments	1 January 2026
Amendments to IFRS 7 and 9: Contract Referencing Nature-dependent Electricity Classification and Measurement of Financial Instruments	1 January 2026
Annual Improvements to IFRS Accounting Standards – Amendments to: • IFRS 1 First-time Adoption of International Financial Reporting Standards; • IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; • IFRS 9 Financial Instruments; • IFRS 10 Consolidated Financial Statements; and • IAS 7 Statement of Cash flows	1 January 2026
IFRS 18: Presentation and Disclosures in Financial Statements	1 January 2027
IFRS 19: Subsidiaries without Public Accountability: Disclosures	1 January 2027

The directors do not expect that the adoption of the Standards listed above will have a material impact on the financial statements of the Group in future periods except for the adoption of IFRS 18.

In April 2024, the IASB issued IFRS 18 Presentation and Disclosure in Financial Statements, which replaces IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations, whereof the first three are new. The standard requires disclosure of newly defined management-defined performance measures, subtotals of income and expenses, and it also includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, narrow-scope amendments have been made to IAS 7 Statement of Cash Flows, which include changing the starting point for determining cash flows from operations under the indirect method, from 'profit or loss' to 'operating profit or loss' and removing the optionality around classification of cash flows from dividends and interest. In addition, there are consequential amendments to several other standards.

The Group is currently working to identify all impacts the amendments as per IFRS 18 will have on the primary financial statements and notes to the financial statements.

Amendments to IFRSs that are mandatorily effective for the current year:

The following amendment to existing IFRS accounting standards became effective for annual periods beginning on 1 January 2025:

Lack of exchangeability - Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates.

The amendment did not have a material impact on the Group's consolidated financial statements at 31 December 2025.

3 Accounting policies

Going concern

The Group's business activities, together with the factors likely to affect its future development, performance as well as the financial position of the Group, its cash flows, liquidity position and obtaining financing facilities are described in this annual report and accounts. In addition, note 37 to the financial statements includes the Group's objectives, policies and processes for managing its capital, its financial risk management objectives, details of its financial instruments and its exposures to credit and liquidity risk.

The Group ensures it meets its capital and liquidity prudential limits and regulatory thresholds on a day-to-day basis by actively managing its cash, short-term treasury placements and longer dated exposures. This also includes stress testing the impact of one or more events that may adversely affect the amount of regulatory capital and positive liquidity of the Group. The Directors monitor the likelihood of such a stress event or combination of events happening on a forward-looking basis regularly and take such preventive and detective actions as appropriate to ensure any stress event or events and their impact is mitigated on a timely basis. The Group's forecasts and projections take account of possible changes in future conditions and performance and the maintenance of planned capital and liquidity resources above the regulatory base requirements for the foreseeable future. In light of the above, the Directors continue to adopt the going concern basis in preparing the annual report and financial statements.

The assessment performed covers the next 12 months from the date of signing the financial statements. The Group has made an assessment of going concern, taking into account both current performance of the Group as well as the war in Ukraine and Middle East, domestic economic crisis, including consideration of projections incorporating the impact of rise in the interest rate, property market for the Group's capital and funding position. Specifically, the Group considered:

- The adequacy and resilience of the Group's capital base throughout the year including revised macro-economic scenarios;
- The impact of negative valuations on the Group's real estate and legacy assets;
- The impact of GLG sale on Capital glide path (see Note 38)
- The adequacy of the Group's liquidity taking into account the hardship policy offered to customers in financial stress and the strength of its retail deposit offering; and
- The regulatory and legal environment and any potential conduct

Basis of accounting

The financial statements have been prepared in accordance with UK-adopted International Accounting Standards as issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost accounting convention except for financial assets and liabilities stated at their fair value, comprising investment securities and derivative financial instruments.

Figures stated in thousands of pounds sterling

These consolidated financial statements disclose figures stated in thousands of pound sterling and are rounded up to the nearest amount in pound sterling.

Significant accounting judgements, estimates and assumptions

• Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect in the amounts recognised in the consolidated financial statements.

Structured entities

The Group uses judgement in determining which entities are structured entities. If the voting or similar rights are not the dominant factor in deciding who controls the entity and such voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual arrangements, the Group identifies such entities as structured entities. After determining whether an entity is a structured entity, the Company determines whether it needs to consolidate this entity based on the consolidation principles of IFRS 10. The management of the Company has determined that it does not have any controlling interest in structured entities as at 31 December 2025 (see Note 21).

• Key sources of estimation uncertainty

Level 3 fair value measurements

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data. Fair value is estimated on the basis of historic cost less impairment and by reference to the net asset value of the underlying investment, where the net asset value is not based on observable market data (see Note 37).

The fair value of unquoted equity securities (See Note 18) has been identified as a key source of estimation uncertainty at 31 December 2025 that has a significant risk of resulting in a material adjustment within the next year. Estimates are involved in assessing the fair value of the equity investment securities based on expected sale proceeds which is significantly derived from property prices. Applying different assumptions at 31 December 2025 to determine expected sale proceeds could materially impact the fair value estimation. As discussed in Note 37, a 20 % decrease in property prices would reduce the fair value of financial assets held at FVTIS by £0.6m and £1.5m as at 31 December 2025 and 2024, respectively. The fair value of financial assets held at FVTOCI would reduce by £241.4k and £155.5k as at 31 December 2025 and 2024, respectively, as a result of 20 % decrease in discount for lack of marketability.

Recoverability of deferred tax asset

Deferred tax assets are recognised in respect of tax losses to the extent that is probable that future taxable profit will be available against which the tax losses can be utilised. Although in the UK, tax losses can be utilised indefinitely, judgment is required to determine the amount of deferred tax asset that can be recognised, based on the likely timing and level of future taxable profit, together with future tax planning strategies.

Accounting policy for deferred tax is set out in taxation section and the details of deferred tax assets and liabilities are set out in note 13.

In recognising a deferred tax asset for unutilised losses, the Directors' make certain judgements around the recoverability of the deferred tax asset.

Judgement is involved in determining the period of time over which it is probable there will be sufficient future taxable profits against which the unutilised losses can be used.

Estimates of the level of future profitability are made in determining the amount of deferred tax asset against unutilised losses at the reporting date. This includes estimating the impact of economic conditions on future profitability.

The factors considered by management in making these judgements and assumptions for the estimates are disclosed in note 13 together with a sensitivity analysis of the deferred tax asset to a change in the estimate of future profitability.

Expected Credit losses (ECL)

The calculation of expected credit losses involves a number of assumptions and assessments. The valuation of expected credit losses is inherently associated with a certain degree of uncertainty. When measuring ECL the Group uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

The IFRS9 engine uses a range of data to calculate the forward looking ECL which includes a macro-economic forecast under a range of economic scenarios. The forecasts and forward-looking information give rise to uncertainties and assumptions.
The below table shows the impact of different macro-economic scenarios on the Group's Residential Property Financing ("RPF") business.

Year	Upside (£'000)	Mild Upside (£'000)	Base (£'000)	Stagnation (£'000)	Downside (£'000)	Severe Downside (£'000)
2025	(989)	(831)	(560)	623	1,307	2,688
2024	(1,026)	(750)	(444)	697	1,187	2,112

(-) sign indicates a release whereas (+) sign denotes a charge. sign indicates a release whereas (+) sign denotes a charge.

Each scenario is assigned a different weight, the sum of weights are 100%. The weights of the blended ECL as recommend by Oxford Economics are 50% for the base case macroeconomic scenario and 10% for the remaining macroeconomic scenarios.

More details of the sensitivity of the RPF ECL allowance to changes in the macro-economic scenarios used in the calculation are set out in note 37.

Real Estate Finance ("REF") business ECL calculation is based on Monte-Carlo simulation and does not follow the scorecard methodology used for RPF portfolio. Please note that this is a closed portfolio and no new deals are booked in this portfolio. The below table shows the impact on REF total impairment when the overall value of collateral is reduced by 10% and 20%. Year 2024 figures are also included for comparison.

Year	10%	20%
2025	£1.6m	£3.6m
2024	£1.6m	£3.5m

Basis of consolidation

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the Group's financial statements.

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved where the Company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities.

Non-controlling interests in subsidiaries are identified separately from the Group’s equity therein.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of the subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When the Group loses control of a subsidiary, the gain or loss on disposal recognised in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as required/permitted by applicable IFRS Standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 when applicable, or the cost on initial recognition of an investment in an associate or a joint venture.

Foreign currencies

The financial statements are presented in sterling, which is the Group's functional and presentation currency, transactions in foreign currencies are initially recorded at the rate of exchange ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the balance sheet date. Non-monetary assets and liabilities are translated into sterling at the effective historical rate used on the date of initial recognition. Exchange differences arising on the settlements of monetary items and on the retranslation of monetary items are included in the profit or loss for the year.

Financial instruments

The Group has applied the accounting policy choice to remain with IAS 39 for fair value hedge accounting.

Measurement categories of financial assets and liabilities

The Group classifies all financial assets into one of the following categories:

1. Amortised cost;
2. Fair value thorough other comprehensive income (FVOCI); and
3. Fair value though income statement (FVTIS):
a. mandatory
b. fair value option.

The starting point for classification of financial assets into respective measurement categories is the business model for managing the financial instruments, as well as whether the instrument's contractual cash flows only constitute solely payments of principal and profit.

Financial liabilities are classified as follows:

1. Amortised cost; and
2. Fair value through income statement (FVTIS):
a. mandatory
b. fair value option.

As a general rule, financial liabilities are recognised at amortised cost. The exceptions are the financial liabilities required to be measured at fair value through profit or loss, such as derivatives and liabilities which, upon initial recognition, are irrevocably identified as being measured at fair value (fair value option).

Upon initial recognition, all financial assets and liabilities are measured at fair value. Directly attributable transaction costs are included in the acquisition cost.

All purchases and sales of financial assets are recognised using settlement date accounting. Changes in fair value between the trade date and settlement date are recognised in the consolidated statement of income or in the consolidated statement of comprehensive income in accordance with the policy applicable to the related instrument. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the timeframe generally established by regulations or conventions in the marketplace.

Business model assessment
The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

· How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel; and
· The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.

The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The Solely Payments of Principal and Profit ("SPPP") test
As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPP test.

Principal is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset. The most significant elements of the profit from a financing arrangement are typically the consideration for the time value of money and credit risk. To make the SPPP assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the profit rate is set.

Financing and advances at amortised cost
Financing and advances at amortised cost include financial assets that are held to collect contractual cash flows that are SPPP. They are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost less impairment losses.

Financial assets held at fair value through the income statement
Financial assets held at value through income statement include unquoted equity securities. Unquoted equity securities are not held for trading and therefore the Group has the irrevocable election at initial recognition to classify the instruments as FVTOCI, which has not been taken. This election is available for each separate investment.

Financial assets classified under this caption are carried in the statement of financial position at fair value with net changes in fair value recognised in the income statement.

Financial assets at fair value through other comprehensive income
Financial assets at fair value through other comprehensive income include unquoted equity securities which the Group has elected to hold as FVTOCI and quoted Sukuk.

The Group may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination, in other comprehensive income. Gains and losses arising from changes in the fair value of these financial instruments are never recycled to the income statement. Dividends on such investments are recognised in the income statement unless the dividend represents a recovery of part of the cost of the investment.

For debt instruments, gains and losses arising from changes in the fair value are recognised in FVTOCI reserve of equity. Upon disposal, the cumulative gain or loss previously recognised in other comprehensive income are recycled to the income statement.

Reclassification of financial instruments

As a general rule, financial assets are not reclassified after initial recognition. Reclassification is permitted in the rare case that the Group changes the business model it applies for the management of financial asset. The reclassification of financial liabilities is not permitted after initial recognition.

No reclassifications have been made during the period covered in the financial statements.

Offsetting financial assets and liabilities

Financial assets and liabilities are set off on the balance sheet if the Group has a contractual right to offset, in its operating activities and in the event of bankruptcy, and if the intention is to settle the items on a net basis or to simultaneously liquidate the asset and settle the liability.

Fair Value Hedge Accounting

IFRS 9 includes an accounting policy choice to remain with IAS 39 hedge accounting, which the Group has exercised. The Group applies fair value hedge accounting to hedge Profit Rate Swaps (“PRS”) which hedge the exposure in fixed rate mortgages in the residential book. Effective 1 January 2023, the Group has transitioned from micro to macro fair value hedge accounting which is in conformity with IAS 39 carve-out.

At the inception of a hedging relationship, the Group documents the relationship between the hedging instruments and the hedged items, its risk management objective and its strategy for undertaking the hedge. The Group also requires a documented assessment, both at hedge inception and on an ongoing basis, of whether or not the hedging instruments that are used in hedging transactions are highly effective in offsetting the changes attributable to the hedged risks in the fair values of the hedged items.

To qualify for hedge accounting, IAS 39 requires that at the inception of the hedge and throughout its life, each hedge must be expected to be highly effective (prospective effectiveness), and demonstrate actual effectiveness (retrospective effectiveness) on an on-going basis; GHB assesses this at inception (prospective effectiveness) and on a monthly basis (retrospective effectiveness). The documentation of each hedging relationship sets out how the effectiveness of the hedge is assessed.

For prospective effectiveness, the hedging instrument must be expected to be highly effective in achieving offsetting changes in fair value attributable to the hedged risk during the period for which the hedge is designated. For actual effectiveness to be achieved, the changes in fair value must offset each other in the range of 80 per cent to 125 per cent, for the hedge to be deemed effective.

The Group determines hedged items by identifying portfolios of homogenous financing based on their contractual profit rates, maturity and other risk characteristics. Financing within the identified portfolios are allocated to repricing time buckets based on expected, rather than contractual, repricing dates. The hedging instruments are designated appropriately to those repricing time buckets. Hedge effectiveness is measured on a monthly basis, by comparing fair value movements of the designated proportion of the bucketed loans due to the hedged risk, against the fair value movements of the derivatives, to ensure that they are within an 80% to 125% range.

The aggregated fair value changes in the hedged financing are recognised and presented in a single separate asset line item on the face of the Statement of financial position as ‘Fair value of hedged assets in portfolio hedges of interest rate risk’. The Group applies the option to amortise the "fair value of hedged assets" (FVHA) to the income statement on a straight-line basis over the remaining period until the repricing of the fixed rate loan assets.

Should hedge effectiveness testing highlight that movements for a particular bucket fall outside the 80-125% range (i.e., the hedge relationship was ineffective for the period), no fair value hedge accounting adjustment is recorded for that month for that particular bucket. Regardless of the results of the retrospective hedge effectiveness testing, at the end of every month, in order to minimise the ineffectiveness from early repayments and accommodate new exposures, the Group voluntarily de-designates the hedge relationships and re-designates them as new hedges. At de-designation, the fair value hedge accounting adjustments are amortised on a straight-line basis.

Derivative Financial Instruments

Derivative financial instruments include Shariah-compliant forward foreign exchange agreements based on the principal and commitment to investment securities and PRS instruments.

Derivative financial instruments are recognised initially, and are subsequently re-measured, at fair value. Fair values of PRS instruments are obtained using discounted cash flow models. The valuation of derivative financial instruments held at fair value through the income statement is recognised in the balance sheet under derivative financial instruments on either the asset or liability side of the balance sheet dependent on whether the valuation is positive or negative respectively. The valuation of one class of derivative financial instruments is not offset against the valuation of another class of derivative financial instruments.

ECL measurement

The Group's financing assets portfolio is split into three asset classes Treasury (placements and Liquid Asset Buffer ("LAB") Sukuk), Real Estate Finance ("REF") and Residential Property Finance Book (Home Purchase Plans ('HPPs') and Buy To Let). ECL is based on a separate estimation of probability of defaults ('PDs'), loss given defaults ('LGDs') and exposures at defaults ('EADs') for each exposure and which are determined based on a combination of internal and external data.

The assets to be tested for impairment are divided into the following three stages:

· Stage 1 comprises financial assets with no significant increase in credit risk since initial recognition.
· Stage 2 comprises financial assets with a significant increase in credit risk since initial recognition, but for which there is no objective evidence that the exposure is credit-impaired at the time of reporting; and
· Stage 3 comprises financial assets for which objective circumstances have been identified indicating that the claim is credit impaired /defaulted. This is in line with the definition of default used for the purpose of the Group's credit risk management.

In Stage 1, provisions are to be recognised which correspond to the loss expected to occur within 12 months as a result of default. In Stage 2 and Stage 3, provisions are to be recognised corresponding to the loss expected to occur at some time during the whole of the remaining maturity of the asset as a result of default.

The significant increase in credit risk reflects the risk of default and is a measurement by which the agreement's relative change in credit risk is measured. The assessment is made up of three elements: quantitative, qualitative and the 30 days past due 'backstop' indicator whereby clients would move from Stage 1 to Stage 2 for RPF. The major triggers for significant increase in credit risk differ between products:

· REF - Missed-payment (one or two), risk events etc ;
· RPF - Missed-payment (one or two) or forbearance.; and
· Treasury – non-payment.

Quantitative modelling is used in conjunction with internal and external credit grades and ratings in assessing whether credit risk has significantly increased. The Group monitors the effectiveness of the criteria used to identify significant increase through regular reviews. For each financial asset the Group also compares the lifetime probability of default (PD) at the reporting date with the lifetime PD that was expected at the reporting date at initial recognition (PD thresholds) in order to identify whether the risk of default has increased significantly.

REF and residential financing portfolios under IFRS 9 consider a financial asset to be in default when either the customer is unlikely to pay its credit obligation, or the customer is more than 90 days past due. Treasury assets are considered to be in default immediately if they are not settled on the due date or when there is evidence that the counterparty is unlikely to pay its credit obligations on the contractual due date.

To supplement the IFRS 9 models, the Group uses post model adjustments (PMA's) where there are known model / data limitations, or the sensitivity is not as expected. The PMA's take into account risk factors and related credit impacts that have not been captured in the model. All PMA's are approved by the CRO and CFO and agreed at the Group's risk committee with a plan for remediation.

Forward-looking information
Under IFRS 9, the Group has incorporated Oxford Economics forward-looking forecasts. The Group uses UK unemployment rate, residential property price index, BoE policy rate and UK 5-Yr Government Bond Yield for a forward-looking assessment into the IFRS9 model.

Write-offs
Financial assets are written off either partially or in their entirety only when the Group has no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

Investment in subsidiaries (for standalone)
The investments in subsidiary undertakings in the Group's financial statements are stated at cost less impairment. Investments in subsidiary undertakings are assessed for impairment where there is an indication of impairment. Where impairment exists, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss recognised in the statement of comprehensive income.

Cash and balances with banks
The caption Cash and Balances with Banks represents cash and current account balances with banks, all held in interest-free accounts.

Property, plant and equipment
Plant and equipment is stated at cost, which includes direct and incremental acquisition costs less accumulated depreciation and impairment losses if any. Depreciation is provided on a straight-line basis over estimated useful life as follows:

- Leasehold Property - Over life of lease
- Leasehold Improvements - Minimum of life of lease or 10 years
- Leasehold Vehicles - Over life of lease
- Property - Over life of lease
- Computer Equipment - 3 years
- Fixtures and Fittings - 5 years

Costs include all incremental, directly attributable external costs incurred in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

An item of property, plant or equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset.

Intangible assets
Intangible assets other than goodwill are accounted for in accordance with IAS 38 Intangible Assets. Intangible assets are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and, in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributable to the assets will flow from their use. Intangible assets are stated at cost (which is, in the case of assets acquired in a business combination, the acquisition date fair value) less accumulated amortisation and provisions for impairment, if any, and are amortised over their useful lives on a straight line basis, in a manner that reflects the pattern to which they contribute to future cash flows, generally using the amortisation periods set out below:

· Goodwill – not amortised;
· Software development costs – 5 years;
· Licence fees – 5 years; and
· Customer lists – 15 years.

Intangible assets are reviewed for impairment when there are indications that impairment may have occurred.

The amortisation share is recorded in depreciation and amortisation.

Goodwill

Goodwill arises on the acquisition of subsidiary and associated entities and represents the excess of the fair value of the acquisition over the identifiable net assets acquired. Goodwill is capitalised and reviewed annually for impairment, or more frequently when there are indications impairment has occurred.

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value. Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest (if any) in the acquiree over the fair value of the identifiable net assets recognised. Goodwill is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination.

Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. The recoverable amount is the higher of fair value less cost to sell and value in use. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. Any impairment loss is recognised immediately in profit or loss and is not subsequently reversed.

Impairment of non-financial assets

The Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered permanent diminution in value. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects a current market assessment of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than the carrying amount, the asset is written down to its recoverable amount. An impairment loss is recognised as an expense in the income statement.

Income and expenses

Income from financial assets held at amortised cost

"Income from financial assets held at amortised cost" consists of profit derived from Shariah-compliant financing and advances under Murabaha, Diminishing Musharaka agreements and Murabaha placements. A Murabaha arrangement represents an agreement whereby the Group purchases a commodity and then sells it to a customer on a deferred settlement basis with an agreed mark-up. A Musharaka contract represents an agreement between the Group and the customer entering into a partnership in the ownership of a specific asset on ongoing basis or for a limited time, during which the Group enters in particular arrangements with the customer to sell to them its share in this partnership until they become the sole owner of the specific asset (diminishing musharaka).

The calculation of profit on financial assets that are not impaired (Stage 1, Stage 2) is performed by applying the effective profit rate to the gross outstanding amount of asset. Once asset is impaired or classified as Stage 3, the effective profit rate is applied to amortised cost of the asset (i.e. gross amount less the expected credit losses).

Profit receivable on Murabaha placements and Diminishing Musharaka is recognised as income on a time-apportionment basis over the period of the contract, based on applying the effective profit rate to the principal amounts outstanding.

Revenue from contracts with customers

The standard for revenue from contracts with customers, IFRS 15, is applied for different types of services which are mainly recognised under Fees and commission income in the income statement.

The income is recognised at the point in time when the performance obligation is satisfied, which corresponds to the transfer of control over the service to the customer. The total income is divided between each service and recognition in income depends on whether the services are fulfilled at a specific point in time, or over time.

The following principles apply to the time at which income is recognised:

· Income earned gradually as the services are performed, is recognised at the rate these services are delivered, i.e. on a straight-line basis over time. This is due to the fact that the customer receives and consumes the service simultaneously, meaning that the Group's obligation is fulfilled in line with the rendering of the service.
· Income attributable to a specific service or action is recognised when the service has been performed, i.e. at a specific point in time. Examples of such income are brokerage and payment commissions.

The income recognised must reflect the anticipated income. When the income includes variable reimbursement, such as refund, bonus or performance-based element, the income is recognised when it is highly probable there that no repayment of the amount will take place. Payments are made on a regular basis as the services are performed and advance payments refer to a maximum of 12 months into the future. Accrued income is recognised for services that have been performed but have not been paid for. Deferred income is recognised for payments received for services which have not been performed.

If the costs incurred in fulfilling a contract with a customer are not within the scope of another Standard (for example, IAS 2 Inventories, IAS 16 Property, Plant and Equipment or IAS 38 Intangible Assets), the Group shall recognise a contract cost asset from the costs incurred to fulfil a contract only if those costs meet all of the following criteria:

· Are directly related to a contract or to an anticipated contract that can be specifically identified by the Group,
· Generate or enhance resources of the Group that will be used in satisfying (or in continuing to satisfy) future performance obligations, and
· Are expected to be recovered.

Costs recognised as contract cost asset are amortised on a systematic basis consistently with the transfer of goods or services related to the asset.

An impairment of contract cost asset should be recognised whenever the asset's value exceeds the remaining consideration to be received, less past and future unrecognised expenses.

Fees and commissions

Fees and commissions are recognised in line with the satisfaction of performance obligations. This can be either at a point in time or over time, in line with the provision of the service to the customer. Fees and commissions arising from transactions for third parties, such as the acquisition of securities or the purchase or sale of other assets, are recognised when right to receive the income has been established. Management advisory and service fees are recognised based on applicable service contracts or over the period the service is provided.

Charges to financial institutions and customers

"Charges to financial institutions and customers" consists of profit payable from Shariah-compliant deposits including Murabaha deposits and Wakala arrangements. A Wakala arrangement represents an agreement whereby the Group accepts a deposit of funds on behalf of a customer to perform an investment activity and endeavours to pay a return based on a pre agreed rate.

Profit payable on Murabaha deposits and Wakala arrangements is recognised as expense on a time-apportionment basis over the period of the contract, based on the principal amounts outstanding.

Share based payments

The Group accounts for its share-option scheme in accordance with IFRS 2. At each balance sheet date, the Group revises its estimate of the number of equity options expected to vest.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of shares that will eventually vest and adjusted for the effect of non-market-based vesting conditions.

Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in shareholders' equity, in which case it is recognised in shareholders' equity.

Current tax is provided on taxable profits at the current rate.

Deferred tax is provided in full using the liability method on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilised.

The Group has recognised deferred tax asset amounting to £9,374K at 31 December 2025 (2024: £7,427k). Deferred tax assets are recognised in respect of tax losses to the extent that is probable that future taxable profit will be available against which the tax losses can be utilised.

Provision

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the effect of the time value of money is material, the Group determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in the income statement net of any reimbursement in other operating expenses. Where the probability of outflow is considered to be remote and a reliable estimate cannot be made, a contingent liability is not disclosed.

IFRS 16 - Leases

IFRS 16 introduced a new definition for leases and confirmed the distinction between two types of leases (operating and finance) with reference to the accounting treatment to be applied by the lessor.

With reference to the accounting treatment to be applied by the lessee, the accounting standard sets, for all the leasing typologies, the recognition of right-of-use assets and lease liabilities in the statement of financial position, initially measured at the present value of the future lease payments.

At the initial recognition such asset is measured on the basis of the lease contract cash flows. After the initial recognition the right of use is measured on the basis of the rules set for the assets by IAS 16 and IAS 38 and therefore applying the cost model, less any accumulated depreciation and any accumulated impairment losses.

The Group decided, as allowed by the standard, not to apply IFRS 16 provisions to:

· Leases of intangible assets;
· Short-term leases, lower than 12 months; and
· Low value assets leases.

In order to calculate the lease liability and the related right-of-use asset, the Group proceeds with discounting the future lease payments at a proper discount rate. In this respect, future lease payments to discount are determined based on contractual provisions.

The lease payments are discounted at the interest rate implicit in the contract or, if it is not available, at the incremental borrowing rate. The latter is determined on the basis of the cost funding for liabilities of similar duration and similar security of those implicit in the lease contract.

In determining the lease term, the Group takes into consideration the non-cancellable period established in the contract, in which the lessee is entitled to use the underlying asset also taking into account potential renewal options if the lessee is reasonably certain to renew. In particular, with regards to those contracts that allow the lessee to tacitly renew the lease contract after a first set of years, the lease term is determined taking into account factors such as the length of the first period, the existence of dismissal plans for the asset leased and any other circumstance indicating the reasonable certainty of the renewal.

Right-of-use assets are disclosed within property, plant and equipment in the consolidated statement of financial position, lease liabilities are disclosed within other liabilities in the consolidated statement of financial position. Finance cost is disclosed within other operating expenses and similar changes in the consolidated income statement, depreciation of right-of-use assets is disclosed within depreciation and amortisation in the consolidated income statement. Cash outflow for lease liabilities is disclosed within cash flows from financing activities in the consolidated statement of cash flows.

The lease term for the Group’s right of use asset is 5 years. There are no future cash outflows to which the lessee is potentially exposed that are not reflected in the measurement of lease liabilities. This asset has been assessed for impairment under IAS 36. The carrying amount of the right of use of assets remains above the recoverable amount of right of use of assets and no impairment has occurred in the year ended 31 December 2025.

Pension costs

The Group operates a defined contribution pension scheme for all staff. The cost of the scheme is equal to the contributions payable to the scheme for the accounting period and is recognised within "Staff costs" in the income statement. The Group has no further obligation once the contributions have been paid.

Non-current assets held for sale and discontinued operations

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable, and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale.

Assets and liabilities classified as held for sale are presented separately as current items in the statement of financial position.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit or loss.

Cash flows from discontinued operations are included in the consolidated statement of cash flows and are disclosed separately in Note 20. The Group includes proceeds from disposal in cash flows from discontinued operations.

Additional disclosures are provided in Note 20. All other notes to the financial statements include amounts for continuing operations, unless indicated otherwise.

4 Income from financial assets held at amortised cost

	2025 £ 000	2024 £ 000
Income from financial arrangements	63,845	64,250
Income from financial institutions	1,855	2,444
	65,700	66,694

5 Foreign exchange gains

	2025 £ 000	2024 £ 000
Net gains / (losses) on translation of derivative financial instruments	1,236	(1,370)
Net (losses)/gains on translation of balances denominated in foreign currency	(1,025)	1,507
Net gain in foreign exchange	211	137

6 Net (losses)/gains on financial assets at fair value through income statement

	2025 £ 000	2024 £ 000
Hedge ineffectiveness and other valuation losses	(1,844)	(341)
Dividend income	-	659
Profit income of unquoted securities	174	-
Realised (loss)/gain on sale of unquoted equity securities	(246)	678
Net revaluation on unquoted equity securities	(136)	1,291
	(2,052)	2,287

7 Staff costs

The aggregate payroll costs for the group were as follows:

	2025 £ 000	2024 £ 000
Wages and salaries	14,811	11,131
Social security costs	1,949	1,527
Pension costs, defined contribution scheme	789	778
Other employee expense	1,613	1,483
	19,162	14,919

The average number of persons employed by the group (including directors) during the year, analysed by category was as follows:

	2025 No.	2024 No.
General Management	15	15
Operations	83	80
Specialist Functions	102	109
Subsidiaries	132	104
	332	308

8 Directors' remuneration

The directors' remuneration for the year was as follows:

	2025 £ 000	2024 £ 000
Remuneration	2,753	2,255
Contributions paid to money purchase schemes	118	131
	2,871	2,386

During the year the number of directors who were receiving benefits and share incentives was as follows:

	2025 No.	2024 No.
Received or were entitled to receive shares under long term incentive schemes	3	3
Accruing benefits under money purchase pension scheme	2	4

In respect of the highest paid director:

	2025 £ 000	2024 £ 000
Remuneration	1,018	812
Company contributions to money purchase pension schemes	47	44

In July 2017 the Group adopted the Gatehouse Long-Term Incentive Plan (LTIP) for the purposes of granting options to eligible employees to incentivise and reward the delivery of the Bank's long-term strategy and growth over a sustained period. The options provide a conditional right to exercise the acquisition of a specified number of ordinary shares in Gatehouse Bank plc subject to an exit event occurring which includes the acquisition of more than 50% ordinary shares of the Bank or a successful completion of an initial public offering (IPO). The exercise price is set at £0.01p per share. The option period is the period beginning on the date on which the option first becomes exercisable and ending on the tenth anniversary of the date of grant. The weighted average remaining contractual life for options outstanding as at end of 2025 is 3.6 years (2024: 4.6 years).

In 2025 there were no new issued numbers of options (2024: nil). There were no options lapsed in 2025 (2024: nil). As a result, the total number of options in issue are 511,000,000 as at 2025 (2024: 511,000,000). In consideration of the conditional right to acquire ordinary shares of the Bank, the value of outstanding option is deemed nil as at 2025 (2024: nil) therefore no expense has been recorded during both periods.

The number of directors who had options received under LTIP is 3 (2024: 3). No options have been exercised during 2025 and 2024.

9 Other operating expenses

	2025 £ 000	2024 £ 000
Occupancy costs	1,083	769
IT and communication costs	2,784	1,750
Amortisation of contract cost assets	378	-
Legal and professional fees *	2,116	2,687
Travel and accommodation *	400	375
Consultancy	568	170
Advertising and marketing	298	261
Other tax payable	853	552
Shariah Supervisory Board fees	75	60
Other operating charges	729	571
	9,284	7,195

*In the previous accounting period, certain costs were misclassified within Travel and Accommodation rather than Legal and Professional Fees. A prior period adjustment has been made to record a reclassification. There was no impact to profit or loss and equity. The prior period adjustment is shown as follows:

	Legal and professional fees £000	Travel and accommodation £000
Year ended 31 December 2024 (as previously reported)	1,679	2,005
Reclassification for Held for sale	(296)	(395)
Year ended 31 December 2024 after Reclassification of HFS (as previously reported)	1,383	1,610
Prior period adjustment	1,304	(1,235)
Year ended 31 December 2024 (as restated)	**2,687**	**375**

10 Impairment (charge) / release

The table below shows the expected credit losses (ECLs) (charges)/reversals on financial instruments during the year recorded in the income statement:

	2025 £ 000	2024 £ 000
Financing and advances at amortised cost	(2,658)	217
Financing commitments	(1)	(17)
Financial assets held at FVTOCI	(66)	(8)
	(2,725)	192

11 Operating Loss

Operating loss is stated after charging:	2025 £ 000	2024 £ 000
Rentals paid under leases	12	8
Depreciation and amortisation expense	1,043	930
Auditor's remuneration	659	595
Net foreign exchange gains	(211)	(137)

12 Auditors' remuneration

	2025 £ 000	2024 £ 000
Audit of accounts	642	580
Other fees to auditors		
Other audit-related services	17	15
	659	595

13 Income tax

	2025 £ 000	2024 £ 000
Analysis of tax charge for the period		
Current tax		
UK Corporation tax based on the profit for the year	-	-
Total current income tax	-	-
Deferred taxation		
Tax losses	(1,947)	(2,167)
Tax receipt in the income statement	(1,947)	(2,167)

The tax on profit before tax for the year is the same as the standard rate of corporation tax in the UK (2024 - the same as the standard rate of corporation tax in the UK) of 25% (2024 - 25%).

The differences are reconciled below:

	2025 £ 000	2024 £ 000
(Loss)/profit before tax	(14,410)	434
Corporation tax at standard rate	3,603	(108)
Adjustments in respect of prior years	64	-
Results from associates and subsidiaries	207	962
Expenses not deductible for tax purposes	36	(74)
Income not taxable for tax purposes	1	1
Other permanent differences	(3)	-
(Decrease)/increase from effect of unrelieved tax losses carried forward	(1,961)	1,386
Total tax credit/(charge)	1,947	2,167

The Finance Act 2021 increases the main rate of corporate tax to 25% with effect from 1 April 2023. As at 31 December 2025, deferred tax asset was valued based on 25% corporation tax rate.

At the statement of financial position date, the Group has unused tax losses of £63,717k (2024: £48,150k) available for offset against future profits. Deferred tax asset is recognised for unused tax losses to the extent it is probable there will be sufficient future taxable profits against which the losses can be used. It requires significant judgements to be made about the projection of long-term future profitability and the period over which recovery extends. The Group has selected a 10-year horizon for the recognition period. A deferred tax asset has been recognised on losses of £37,496k and £29,707k in 2025 and 2024, respectively. As at 31 December 2025 and 31 December 2024, no deferred tax asset has been recognised in respect of the remaining £26,222k and £18,443k, respectively, of losses and £3,520k and £3,108k, respectively, of other temporary differences at the statement of financial position date due to limited certainty with respect to forecasting profits over extended future periods.

In assessing future profitability, the management considered a range of positive and negative evidence for this purpose. The principal positive evidences and factors include:

- The absence of any expiry dates for UK tax losses.
- The ability to generate future profits through continued growth of profit generating assets.

Against this, there are a number of uncertainties inherent in any long-term financial assumptions and projections and other negative evidence, including:

- Incurred an accumulated pre-tax loss of £49.3 million in previous years.
- Political uncertainty and potential risk of further taxation of UK BTL market.
- Difficulty of predicting future revenues accurately.

Sensitivity of the deferred tax asset to changes in assumptions:

Determining the value of the deferred tax asset relies on making judgments about when it will be recoverable and estimating future income. If future earnings deviate from current forecasts, adjustments may be necessary, potentially impacting the income statement significantly in the coming years. The sensitivity of the deferred tax asset on unutilised tax losses due to changes in forecasts and assumptions was considered.

Impact of change in assumptions:

Profit forecast: On DTA balance as at 31 December 2025, if the profitability forecast for 2026 – 2030 was assumed to be 10% lower than projected, the deferred tax asset balance would decrease by £937k to £8.44m.
On DTA balance as at 31 December 2024, if the profitability forecast for 2025 – 2029 was assumed to be 10% lower than projected, the deferred tax asset balance would decrease by £742k to £6.68m.

Profit growth: For standalone GHB profits, 2% increase in profits is projected starting from 2031. If this assumption was changed to 1% growth for all years from 2031 to 2035 while maintaining a 10-year horizon, the deferred tax asset balance on 31 December 2025 would decrease by £55k to £9.32m.
For standalone GHB profits, 2% increase in profits is projected starting from 2030. If this assumption was changed to 1% growth for all years from 2030 to 2034 while maintaining a 10-year horizon, the deferred tax asset balance on 31 December 2024 would decrease by £66k to £7.36m.

14 Derivative financial instruments & changes in the fair value of hedged assets

	2025	2024*
Assets	**£ 000**	**£ 000**
Derivative financial instruments	2,348	11,337
Fair value of hedged assets in portfolio hedges of interest rate risk	2,377	(371)
	4,725	**10,966**
Liabilities		
Derivative financial instruments	(2,736)	(11,110)
	(2,736)	**(11,110)**

*A prior period adjustment has been made to record a reclassification of various items of the accumulated balance of changes in the fair value of hedged assets in macro hedges of interest rate risk from the Statement of Financial Position line items "derivatives assets" to "Fair value of hedged assets in portfolio hedges of interest rate risk". An adjustment has also been made to reclassify various items of the accumulated balance of changes in the fair value of hedged assets in discontinued micro and macro hedges of interest rate risk from the Statement of Financial Position line item from "derivatives liabilities" to "financing and advances at amortised cost" and "Fair value of hedged assets in portfolio hedges of interest rate risk", respectively. There was no impact to profit or loss and equity. The Statement of Financial Position as at 31 December 2024 has been represented as follows:

	Financing and advances at amortised cost	Fair value of hedged assets in portfolio hedges of interest rate risk	Derivative financial instruments - Asset	Derivative financial instruments - Liability
Year ended 31 December 2024 (as previously reported)	1,322,888	-	31,054	(38,150)
Prior period reclassification	(6,952)	(371)	(19,717)	27,040
Year ended 31 December 2024 (as restated)	**1,315,936**	**(371)**	**11,337**	**(11,110)**

"Derivative financial instruments - Assets", "Derivative financial instruments - Liabilities" and and "Fair value of hedged assets in portfolio hedges of interest rate risk" are represented in the remainder of Note 14.

"Financing and advances at amortised cost" Note 17 have been represented accordingly in Note 17.

Further Breakup of Derivative financial instruments shown below:

Assets - Derivative financial instruments	2025 £ 000	2024 £ 000
FX Forwards & others	1,052	248
Accrued profit of hedged instrument	647	1,425
Fair value adjustment to hedging instrument	649	9,664
	2,348	**11,337**
Liabilities - Derivative financial instruments		
FX Forwards & others	(2,736)	(11,110)
	(2,736)	**(11,110)**

Hedge accounting

Fair value hedges

The Group undertakes Shariah compliant derivatives, profit rate swaps ("PRS") to hedge the exposure in fixed rate financing in the residential book.

At the inception of the hedge there is formal designation and documentation of the hedging relationship and the entity's risk management objective and strategy for undertaking the hedge. The hedge is expected to be highly effective in achieving offsetting changes in fair value attributable to the hedged risk, consistently with the originally documented risk management strategy for that particular hedging relationship. The effectiveness of the hedge can be reliably measured, i.e. the fair value of the hedged item that are attributable to the hedged risk and the fair value of the hedging instrument can be reliably measured. The hedge is assessed on an ongoing basis and determined actually to have been highly effective throughout the financial reporting periods for which the hedge was designated.

Hedge effectiveness for the Group's PRS can be explain by:

- Floating leg of the PRS will have a value on any day other than the reset date. The floating leg only exists in the hedging instrument and not the hedged item so ineffectiveness will result;
- Prepayments of the hedged items will cause an over-hedged position and ineffectiveness will result; and
- Maturity dates of the hedged items and the hedging instruments differ so ineffectiveness will result.

The table below show the fair values of financial instruments designated for hedging, recorded as assets or liabilities, together with their notional amounts:

Group and Company

	2025 £ 000	2024 £ 000
Notional Principal	**338,000**	**403,000**
Hedging Item		
Asset		
Changes in the fair value of hedged assets in portfolio hedges of interest rate risk	27,784	19,717
Changes in the fair value of hedged assets (FVHA) in discontinued hedges of profit rate risk	(25,407)	(20,088)
Fair value of hedged assets in portfolio hedges of interest rate risk	**2,377**	**(371)**
Carrying Value of hedged item	2,377	(371)
Hedging Instrument		
Asset		
Fair value adjustment to hedging instrument	649	9,664
Accrued profit of hedged instrument	647	1,425
Carrying Value of hedging instrument	**1,296**	**11,089**
Net Profit Rate Swaps Fair Value Hedges	3,027	9,294
Net Profit Rate Swaps Accrued profit	647	1,425
Net carrying value of hedged item and hedging instrument	**3,674**	**10,719**

The line item in the Statement of Financial Position that includes the hedging instrument is 'Derivative Financial Instruments' and the line item that includes the hedged item is 'Financing and advances at amortised cost'.

For actual hedge effectiveness to be achieved, the changes in fair values of hedging instrument and the hedged item must offset each other in the range of 80 per cent to 125 per cent, for the hedge to be deemed highly effective. Effectiveness is driven by (i) Maturity dates of the hedged items and the hedging instruments differ (ii) Payment frequencies/ payment dates differing between the hedged item and hedging instrument (iii) The floating leg only exists in the hedging instrument and not hedged item. The hedge ineffectiveness recognised in the income statement for the year 2025 is £609k loss (2024: £341k loss).

The below table sets out the outcome of the Group's hedging strategy, in particular, to changes in the fair value of the hedged items and hedging instruments in the current year and the comparative year, used as the basis for recognising ineffectiveness. The hedge ineffectiveness is recognised as part of 'Net gains on financial assets at fair value through income statement' line as disclosed in note 6.

£ 000's

		2025			2024		
		Gains/(losses) attributable to the hedged risk		Hedge Effectiveness	Gains/(losses) attributable to the hedged risk		Hedge Effectiveness
Hedged Items	Hedging Instrument	Hedged Items	Hedging Instrument		Hedged Items	Hedging Instrument	
Fixed rate mortgages	Profit rate swaps	7,072	(8,505)	(83.16)%	3,296	(3,636)	(90.62)%

15 Company profits attributable to equity shareholders

£11,540K of the company loss for the financial year (2024: £3,649K profit) has been presented in the accounts of the Group.

16 Additional cash flow information

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise the following at 31 December:

	2025	2024
	£ 000	£ 000
Cash and balances with banks	24,599	27,823
Cash and balances with bank attributable to discontinued operations	2,612	-
	27,211	**27,823**

17 Financing and advances at amortised cost

Financing and advances to customers, corporates and financial institutions are held at amortised cost.

That is, the initial fair value (which is normally the amount advanced or financed) is adjusted for repayments and fees to represent the effective finance rate of the asset.

Group

	Avg. Yield	2025 £ 000	Avg. Yield	2024 £ 000
Gross financing and advances at amortised cost		1,277,066		1,325,756
Less: allowances for impairment		(12,507)		(9,820)
Financing and advances at amortised cost*	5.16%	1,264,559	5.10%	1,315,936

*A prior period adjustment has been made to reclassify various items of the accumulated balance of changes in the fair value of hedged assets in discontinued micro and macro hedges of interest rate risk from the Statement of Financial Position line item from "derivatives liabilities" to "financing and advances at amortised cost" and "Fair value of hedged assets in portfolio hedges of interest rate risk", respectively. See further details of the representation in note 14.

Exposure on financing and advances at amortised cost subject to impairment testing:

Financing and advances at amortised cost

2025

20 Investment in Subsidiaries and Disposal Group Subsidiaries Classified as Held for Sale

The Group consists of a parent company, Gatehouse Financial Group Limited, incorporated in Jersey and a number of subsidiaries held directly and indirectly by Gatehouse Financial Group Limited, which operate and are incorporated around the world. Kuwait Investment Authority and The Securities House K.S.C.P are the ultimate controlling party.

Group subsidiaries

Information about the composition of the Group at the end of the reporting period is as follows:

Subsidiaries	Principal Activity	Place of business & Country of incorporation	GFG consolidated interest
Directly held:			
Gatehouse Bank plc	Banking and Investment Advisory	England & Wales	100.0%
Gatehouse Capital (GC1) Limited	Provision of Bridge Financing	England & Wales	100.0%
Indirectly held:			
Held through Gatehouse Bank plc			
Gatehouse Build to Rent Group Limited	Holding Company	England and Wales	100%

Disposal Group Subsidiaries Classified as Held for Sale

The following subsidiaries of the group are indirectly held through Gatehouse Build to Rent Group Limited. These subsidiaries were classified as held for sale (DGSCHFS) as at 31 December 2025 are as follows:

Name of subsidiary	Principal activity	Registered office	Proportion of ownership interest and voting rights held 2025	2024
Gatehouse Build to Rent Group Limited	Holding Company	The Helicon, One South Place, London, United Kingdom, EC2M 2RB England and Wales	100%	100%
Ascend Estates Limited	Management of real estate	Stafford Court, 145 Washway Road, Sale, England, M33 7PE England and Wales	100%	100%
Gatehouse Investment Management Limited	Real Estate Investment Advisory	The Helicon, One South Place, London, United Kingdom, EC2M 2RB England and Wales	100%	100%

The opportunity has been identified to combine Ascend and the Group's real estate investment advisory (REIA) arm in relation to SPV, as discussed in note 21, under one branded entity, with a view to adding future value within a fast-growing sector of the UK real estate market. As a result of this initiative, REIA business was transferred to Gatehouse Investment Management Limited (GIM) in April 2023. Consequently, the Bank transferred its entire holding in GIM and Ascend to Gatehouse Build to Rent Group Limited (GBTRG). The Group has accounted the restructuring transaction under common control under book-value method of accounting.

The recoverable amount of this investment in subsidiary as a cash-generating unit (CGU) is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a year period. The pre-tax discount rate applied to the cash flow projections is 13.3%. The growth rate used to extrapolate the cash flows of the unit beyond a year period is 2%.

The calculation of the value in use for the unit is most sensitive to the following assumptions:

• Forecast growth rate. This rate is in line with the economic and fiscal outlook for the UK economy from 2026-2030.

• Earnings before income tax, depreciation and amortization (EBITDA). EBITDA forecast is based on historical experience of operating margins, adjusted for the impact for any potential adverse market movement.

• Discount rate. This represents the current market assessment of the risks specific to the CGU, taking into consideration the time value of money and pertinent risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the bank and its operating segments and is derived from its weighted average cost of capital (WACC). The WACC takes into account both debt and equity. The cost of equity is derived from the expected return on investment by the company's investors. Although cost of debt is not part of permanent capital structure of the company, this portion was derived by taking into account pertinent risk-free rate of a government bond which will be repaid at maturity.

The movement of the Goodwill during the year is provided in note 23.

In December 2025, the Group's Board of Directors approved the plan to sell GBTRG. The sale of GBTRG was completed on 31 March 2026 - see note 38. On 31 December 2025, GBTR was classified as a disposal group held for sale and as a discontinued operation. The results of GBTR for the year are presented below:

	2025 ('£000)	2024 ('£000)
Income		
Income from financial assets held at amortised cost	253	138
Charges on financial liabilities	(4)	1
Net margin	**249**	**139**
Fees and commission income	13,081	15,860
Fees and commission expense	(664)	(243)
Net income (loss) on financial assets at FVTPL	237	-
Total operating income	**12,903**	**15,756**
Expenses		
Staff costs	(7,207)	(6,130)
General and administration	(2,471)	(2,482)
Depreciation and amortisation	(552)	(382)
Total operating expenses	**(10,230)**	**(8,994)**
Operating gain on ordinary activities before tax	**2,673**	**6,762**
Tax on profit on ordinary activities	(749)	(1,715)
Profit / (loss) for the year	**1,924**	**5,047**

The major classes of assets and liabilities of GBTRG classified as held for sale as at 31 December are, as follows

	2025 ('£000)
Cash and balances with banks	2,612
Financing and advances at amortised cost	-
Financial assets held at FVTIS	2,237
Goodwill	4,242
Intangible Assets	405
Property, plant and equiptment and right-of-use assets	767
Other assets	3,288
Assets held for sale	**13,551**
Other liabilities	4,743
Liabilities directly associated with the assets held for sale	**4,743**
Net assets directly associated with disposal group	**8,873**
Share capital	-
Reserve as a result of subsidiary acquisition	6,863
Retained earnings	1,945
Reserve of disposal group classified as held for sale	**8,808**

The net cash flows incurred by GBTRG are as follows:

	2025 £000	2024 £000
Operating	136	3,471
Investing	(1,414)	(1,389)
Financing	(40)	(297)
Net Cash (outflow)/Inflow	**(1,318)**	**(1,785)**

21 Disclosure of interests in other entities

The Group has investments in a number of special purpose vehicles (SPVs) that have an interest in UK property. The Group provides investment advisory services in relation to the investments. The investment SPVs have two classes of equity: management shares which carry voting rights; and participating shares which represent economic interests in the SPVs. None of the SPVs are consolidated by the Group as the Group holds only a small percentage of the participating shares and acts as agent in its capacity as investment advisor for the SPVs. Typically, the Group receives a fixed annual advisory fee for its services which is not linked to the performance of the SPV and a performance fee of 20% of profits achieved over a specified rate of return.

None of the SPVs are consolidated by the Group as the Group holds only a small percentage of the participating shares and has no involvement in the management or control of the SPVs.

The Group's gross investment in property SPVs is £2,827k (2024: £ 8,228k) which is included in financial assets held at fair value through the income statement. The Group has also provided funding through fixed term Murabaha contracts as bridge financing to these SPVs. The Group's maximum loss relating to these SPVs is equal to the exposure in the SPVs. The primary risk to which the Group is exposed is the risk of changes in the valuation of the Group's investment in the SPV due to changes in the valuation of the property held by each SPV or changes in the cash flows generated by the property.

The Group uses foreign currency agreements for matching currency exposure. The Group also uses derivatives to prudently manage its profit rate risk, which allows the Group to hedge against risks arising from deposits of certain short-term maturities and longer-term financing.

26 Leases

Lease liabilities maturity analysis

A maturity analysis of lease liabilities based on undiscounted gross cash flow is reported in the table below:

	2025 £ 000	2024 £ 000
Less than one year	446	359
One to five years	497	440
Total lease liabilities (undiscounted)	943	799

Amount recognised in the income statement

	2025 £ 000	2024 £ 000
Expenses on lease liabilities	35	47
Expenses relating to short-term leases	-	-
Expenses relating to leases of low value assets, excluding short-term leases of low value items	-	-
	35	47

Total cash outflows related to leases

Total cash outflows related to leases are presented in the table below:

Payment	2025 £ 000	2024 £ 000
Right of use assets	(267)	(401)

27 Other assets

	2025 £ 000	2024 £ 000
Receivable on Forward Flow agreement	31,809	23
Accrued income receivable	376	368
Prepayments	1,354	1,365
Other debtors	2,377	6,194
Contract cost asset	378	756
	36,294	8,706

Receivable on forward flow agreement pertains to an agreement wherein Group originates residential financing for its partner.

Certain cost to fulfil a contract has been recognised as contract cost asset in December 2025. No amortisation expense has been recognised in 2025.

In 2025, fees and commission income amounting to £2,704k includes £1,031k in relation to forward flow agreement, and £900k relating to sale of a fund during Q4 2025.

28 Financial liabilities measured at amortised cost

	Avg. Yield	2025 £ 000	Avg. Yield	2024 £ 000
Financial liabilities measured at amortised cost at 1 January	4.74%	1,288,832	4.72%	1,316,464
Net outflow to financial institutions and customers		(539)		(26,905)
Financing and advances at amortised cost		(914)		(727)
Financial liabilities measured at amortised cost at 31 December	4.11%	1,287,379	4.74%	1,288,832

The total accrued profit for financial liabilities at amortised cost during 2025 is £50,933k (2024: £51,092k).

29 Other liabilities

	2025 £ 000	2024 £ 000
ColCap Financial UK	3,648	1,429
Other taxes and social security costs	665	481
Lease liabilities	946	799
Other Provisions	-	143
Other creditors	2,303	5,797
	7,562	8,649

30 Maturity analysis of financial assets and liabilities

The table shows an analysis of assets and liabilities analysed between those expected to be recovered or settled from the balance sheet date:

2025 Assets	Less than 12 months £ 000	More than 12 months £ 000	Total £ 000
Cash and short-term deposits	24,599	-	24,599
Financing and advances at amortised cost	78,351	1,186,208	1,264,559
Financial assets held at fair value through the income statement	-	2,827	2,827
Financial assets held at fair value through other comprehensive income	11,783	28,730	40,513
Derivative financial instruments	2,348	-	2,348
Fair value of hedged assets in portfolio hedges of interest rate risk	2,377	-	2,377
Other assets	36,294	-	36,294
Total financial assets	155,752	1,217,765	1,373,517

2025 Liabilities	Less than 12 months £ 000	More than 12 months £ 000	Total £ 000
Financial liabilities measured at amortised cost	1,019,111	268,268	1,287,379
Derivative financial instruments	2,736	-	2,736
Total financial liabilities	1,021,847	268,268	1,290,115

*Various components in "Other assets" are financial instrument in nature therefore 2024 table has been represented to include other asset in the above maturity analysis table.

31 Assets and liabilities in foreign currency

The Group manages its exposure to foreign exchange rate fluctuations by matching assets with liabilities in the same currency as far as possible.

	2025 £ 000	2024 £ 000
Assets		
Denominated in Sterling	1,369,510	1,386,977
Denominated in other currencies	30,913	30,311
	1,400,423	1,417,288
Liabilities		
Denominated in Sterling	1,298,149	1,307,730
Denominated in other currencies	4,271	861
	1,302,420	1,308,591

32 Pension and other schemes Defined contribution pension scheme

The Group provides a defined contribution pension scheme for all staff. The assets of the scheme are held separately from those of the Group in independently administered funds. During the period, pension costs of £788k were charged to the income statement (2024: £778k). The pension creditor outstanding at the balance sheet date amounted to £113k (2024: £101k).

33 Share capital

	2025 £'000s	2024 £'000s
Authorised: *Unlimited*		
Issued: 17,000,000,100 ordinary shares of no par per share	-	-
Issued and fully paid :		
16,200,000,100 ordinary shares		
15,000,000,100 shares paid up by 1 pence per share	150,000	150,000
1,200,000,000 shares paid up by 0.75 pence per share	9,000	9,000
	159,000	159,000
Issued and partly paid :		
493,000,000 ordinary shares paid up by 0.01 pence per share	4,930	4,930
Issued but not paid :		
307,000,000 Ordinary shares	3,070	3,070
Total issued share capital	**167,000**	**167,000**

The issued and non-fully paid share capital relates to shares previously issued to the Gatehouse Bank's former Employee Benefit Trust (EBT). These shares were transferred to Gatehouse Financial Group Limited, following the share for share exchange in 2015.

34 Own Shares

The Own Shares reserve represents the shares issued as part of the Group's Employee Incentive Plan, held by the Employee Benefit Trust on behalf of participating employees and the Trustee. 800,000k ordinary shares of £0.01 each (2024: 800,000k ordinary shares) were held by the Employee Benefit Trust at 31 December 2025 of which 493,000,000 were partly paid up to £0.0001 per share (2024: 493,000k).

35 Off balance sheet items

Financing commitments

At the balance sheet date, the Group has outstanding financing commitments relating to residential property financing portfolio as follows:

	2025 £ 000	2024 £ 000
Within one year	86,474	75,161

Expected credit losses on financing commitments as at 31 December 2025 amounted to £103k (31 December 2024: £37k). These amounts are recorded as part of ECL in relation to Financing and advances at amortised cost.

36 Related party transactions

The Group is a wholly owned subsidiary of Gatehouse Financial Group Limited ("GFGL").

The Kuwait Investment Authority and The Securities House are shareholders of Gatehouse Financial Group Limited.

All related parties' transactions were entered into at an arm's length price; amounts outstanding and transaction during the period with related parties as at 31 December were as follows. Transaction during the period predominantly pertains to recharges from the Group to related parties. These transactions were incurred by the Group on behalf of the related parties therefore recharged.

2025

	Shareholder Kuwait Investment Authority £ 000	Shareholder The Securities House K.S.C.C. £ 000

The disclosure requirement in respect of remuneration to key management personnel has been met by providing Directors' emoluments note details in note 8.

37 Risk Management

The Risk Management function forms an integral part of Gatehouse's three lines of defence risk governance model. Its role, as the second line of defence, is to provide the control functions (Risk and Compliance) for the Board that are robust and commensurate to scale and nature of the business activities that the Group undertakes. It discharges these responsibilities through monitoring performance against set limits and tolerances to risk exposures, through various validation and exception reports, through the composition of prudential reports and through stress testing and sensitivity analysis. The Internal Audit function, performed by Grant Thornton, a professional services firm, performs regular reviews of different activities of the Group represents the third line of defence.

The Risk Management Function provides the day-to-day monitoring of risk exposures to ensure that the Group's activities remain within the risk appetite parameters set by the Board.

The Chief Risk Officer is responsible for the risk management and compliance function, which considers all material risks on a consolidated basis and, in this respect, chairs the Executive Risk Committee.

Credit Risk

Credit risk is the risk of suffering financial loss in the event that one or more of the Group's customers, clients or market counterparties fail to fulfil their contractual obligations. Credit risk may also arise where the downgrading of an entity's credit rating causes the fair value of the Group's investment in that entity's financial instruments to fall. The credit risk that the Group faces arises mainly from financing residential real estate, Treasury activities, real estate equity investment and senior and mezzanine commercial real estate financing.

The Group's Risk function covers several areas in respect of assessing credit related exposures:

• The overall management and implementation of the risk appetite framework as determined by the Board; determining mandate and scale limits and implementing the risk appetite as set by the Board;
• Assessment of existing and potential Treasury counterparties and Sukuk by undertaking comprehensive credit risk assessments and making recommendations to the appropriate decision making forums. This includes monitoring of portfolio composition; and
• The monitoring of exposures to ensure compliance with approved limits and that the credit quality of the counterparty has not deteriorated or circumstances changed. Monitoring provides a picture of the portfolio as a whole and its inherent risks, including concentrations and capital allocation.

In view of the Group's strategic focus on real estate business, the Risk function also covers the following:

• Assessment of real estate equity investments and senior and mezzanine financing activities via the provision of comprehensive credit risk assessments making recommendations to appropriate decision-making forums. This includes monitoring of portfolio composition; and
• The ongoing monitoring and review of credit risk for real estate equity investment and finance exposures to ensure compliance with covenants and early identification of changes to the credit risk profile and composition of the portfolio.
• Enhanced analysis of potentially deteriorating credit exposures through a 'watch list' process.

A comprehensive control framework is in place. This incorporates:

• Maximum exposure guidelines relating to exposure to an individual counterparty or transaction;
• Country / Region specific limits to avoid excessive concentration of credit risk; and
• Industry specific limits to avoid excessive concentration of credit risk in individual economic sectors

A range of analysis methodologies are used to determine the credit quality of a counterparty, such as quantitative analysis, qualitative analysis, credit rating model, external rating agency research, industry specific research and for wholesale assets, market information such as credit spreads. The current Internal Capital Adequacy Assessment Process (ICAAP) is based on the Group adopting the Standardised approach to credit risk quantification for capital purposes.

The Group has in place processes for estimating the impairment provision on loans and advances associated with credit risk in accordance with IFRS 9 Financial instruments (IFRS 9). IFRS 9 requires use of expected credit loss ("ECL") models for the purposes of calculating impairment loss.

The Group's ECL models allow the assessment of the credit risk exposure to the Group that is inherent in financial assets and commitments (Treasury assets (including LAB Sukuk), real estate finance and residential property finance). The models are jointly controlled by Risk and Finance functions, who also agree the nature of forward-looking scenarios.

The ECL models require the Group to exercise judgement using subjective assumptions when determining both the timing and the amounts of ECL for loans and advances subject to credit risk.

Sensitivity Analysis

As per the sensitivity analysis of macro-economic factors, PD and ECL are expected to increase due to worsening economic projections, including economic growth, unemployment rates, and product rate increases, on the other hand, improving economic forecasts and rate decreases are anticipated to reduce the PD and ECL. LGD is inversely proportional to house prices, it would elevate if house prices fell, and would decline if house prices increased. The influence of economic variables differs according to different portfolios. The computation of ECL is on a per-customer basis, considering local indexation, with modifications made to account for additional risk factors in geographical areas that are projected to respond more strongly to changes in economic conditions.

The major assumptions considered for the analysis include unemployment forecasts, predicted housing price changes, and borrowing rate movements.

Exposure of credit risk

The Expected credit loss estimate is essential to be based on an unbiased expectation of future economic scenarios. The Group's approach incorporates a starting point which is a defined base case scenario used for planning purposes and to further generate alternative economic scenarios around the base case. The base case scenario is a conditional forecast based on numerous assumptions that represent the Group's best estimate of significant future developments.

The parameters used with group's ECL model include macroeconomic factors which have been established as drivers of the default risk and loss estimates. As a result, in each scenario an estimate of credit losses is calculated using the combination of these macroeconomic factors.

The ECL calculation incorporates multiple economic scenarios which have been weighted according to considered likelihood. The table below shows the weightings and peak values of the key variables used within the scenarios, based on a 5-year forecast.

2025 Relevant economic variables

Scenario	Key Economic Variables	Year

The base case scenario is in line with the annual financial forecast of the company and has been revised in line with the recent changes in the economic environment on the reporting date. To exhibit the best judgment of the management, the scenario weighting shall be reviewed regularly throughout the year. The slight upturn and downturn economic scenarios are viewed as less likely and are weighted accordingly in the model.

Note 3 refers to the basis by which the Group reviews for impairments of its financial assets. Note 10 details the impairment provisions taken in the year to the income statement.

Credit risk

Credit quality analysis

Exposure

The table below shows the maximum exposure to credit risk for financial assets on the balance sheet at 31 December 2025 and 31 December 2024:

	2025 £ 000	2024 £ 000
Cash and balances with banks	24,599	27,823
Financing and advances at amortised cost	1,264,559	1,315,936
Financial assets held at fair value through other comprehensive income (Debt Assets)	40,513	30,613
Derivative financial instruments	2,348	11,337
Fair value of hedged assets in portfolio hedges of interest rate risk	2,377	(371)
	1,334,396	1,385,338

Geographical region

The Group's credit exposure can be analyzed into the following geographical regions based on the location of the obligor:

	2025 £ 000	2024 £ 000
Kuwait	5,346	6,339
UAE	30,031	48,798
Qatar	7,278	58,137
Saudi Arabia	44,219	34,907
Oman	1,473	2,064
Bahrain	2,569	3,252
GCC Countries	90,916	153,497
Europe	1,059,771	1,000,711
North America	18,299	21,060
South America	894	933
Asia	144,845	184,631
Africa	12,975	14,029
Australasia	6,696	10,477
	1,334,396	1,385,338

Credit quality

The table below shows the credit quality of financial assets on the balance sheet at 31 December 2025 and at 31 December 2024, based on a credit rating system:

2025	Investment grade £ 000	Non-investment grade £ 000	Non-rated £ 000	Total £ 000

Liquidity risk

The group's definition of liquidity risk is the Group will be unable to meet its short-term payment obligations when they fall due, without a loss of capital and/or income. Liquidity risk management on a day-to-day basis is the responsibility of the Treasury department which is overseen and monitored by the Risk function and the Asset and Liability Committee. To manage this risk, the Group maintains an adequate portfolio of liquid assets which consists of cash and short-term bank deposits and Sukuk by monitoring forecast and actual cash flows and matching the maturity profiles of assets and liabilities. The Group is subject to and complies with the systems and control requirements of the PRA and CRD IV liquidity regime. The company manages this through The Group's two principal sources of funding. Those being: i) funding from retail aggregators via Rasin, Flagstone and Akoni deposits ii) retail deposit platform Gatehouse savings. The Group has actively sought to reduce its reliance on shareholder funding and has concentrated its efforts in raising alternative funding via its retail savings platform, Gatehouse savings, Rasin, Flagstone and Akoni deposits. As at 31 December 2025 Gatehouse savings deposits were £1,045m (2024: £1,008m) and Retail aggregator deposits were £202m (2024: £246m).

Liquidity and rate profile

The following table sets out the remaining contractual maturities of the group’s financial liabilities and financial assets by type.

2025	Less than 1 month £ 000	1-3 months £ 000	3 - 6 months £ 000	6 - 12 months £ 000	1-5 years £ 000	Total £'000

Market risk

The group's definition of market risk is Market risk is the risk of loss arising from a potential change in the value of an instrument or portfolio of instruments as a result of changes in market parameters (such as interest rates, equity indices, bond prices, commodity markets and exchange rates) during a specified time horizon. The Group is exposed to market risk in the management of its balance sheet. The role of the Risk function is to identify, quantify, manage and monitor the potential effects of those potential changes on the value of the portfolio, and broader balance sheet.

The Board sets and approves the market risk appetite for the Group's activities. The Group's Treasury department generally manages market risk. The Risk function implements a quantitative and qualitative limit framework within the context of the approved market risk appetite. A daily market risk report summarises market risk exposures against agreed limits. This daily report is circulated to the Treasurer for review.

A detailed market risk presentation is produced monthly and discussed at the Asset and Liability Committee.

• **Market risk measurement**

The techniques used to measure and control market risk include:

Nominal exposure limits: overnight and intraday limits;
• Value at Risk: an estimate of potential changes in the fair value or market value of the Bank's portfolio due to changes in market risk factors;
• Maximum loss: an estimate of the potential loss the Bank would have made on its portfolio had it held the same portfolio every day for the last 12 months;
• Sensitivity Analysis: an estimate of the potential loss incurred due to a specified change in a specified market risk factor; and
• Stress Testing and Scenario Analysis: used to estimate vulnerability to exceptional but plausible events. Stress testing ensures the adequacy of capital and liquidity, the viability of strategy and assesses the risks impacting Gatehouse Bank across a range of market conditions.

Although the Group only trades in Shariah-compliant products, the carrying value of financial instruments held by the Group is sensitive to movement in interest rates. If interest rates had been 200 basis points higher/lower and all other variables were held constant, the Group's profit for the year ended 31 December 2025 would decrease/increase £5,949k (2024: £7,332k).

In order to meet internal and client demand, the Group maintains access to market liquidity by using all reasonable endeavors to quote bid and offer prices with other market makers and carries an inventory of approved capital market and treasury instruments, including a range of cash, securities and treasury products. These include Commodity Murabaha, Wakala, Islamic foreign exchange forwards and Profit Rate Swaps or a combination of these instruments.

Value at Risk

Profit Rate Risk (equivalent to Interest Rate Risk)

The varying profit share features and maturities of products, together with the use of Treasury products create Profit Rate Risk ('PRR') exposures due to the imperfect matching of margins and maturity differences between assets and liabilities.

The Group uses derivatives to prudently manage its PRR. As at 31 December 2025, the Group had total £338m (2024: £403m) in the form of fixed for floating rate, which allowed the Group to tactically hedge against risks arising from deposits of certain short-term maturities and longer-term financing.

Overarching PRR limits are set by the Board and articulated accordingly within the Risk Appetite Statement. The Board have further delegated oversight of PRR to the Group's Executive Committee who mandate the Group's Asset and Liability Committee (ALCO) to monitor and assess PRR. Basis Point Value (BPV) and Value at Risk (VaR) is used to monitor the risk arising from open profit rate positions. The Group's Pillar 1 minimum capital requirement allows for profit rate risk through the profit rate risk requirement.

As at 31 December 2025, the market value of nominal positions generating profit rate VaR was £56m (2024: £92m) which generated profit rate VaR of:

2025	95% VaR (£)
One day	(12,296)
One week	(18,225)
2024	**95% VaR (£)**
One day	(8,371)
One week	(9,867)

The Group applies VaR methodology for measuring interest rate, currency and basis spread risks for both the trading portfolio and banking books. VaR measure adopted by the Group estimates the potential negative change in the market value of a portfolio at a 99% confidence level over a 1-day horizon. The Group distinguishes the following types of VaR:

1. Total VaR is calculated for all risk factors taken in aggregate;
2. Interest rate VaR is originated from interest rate risk exposure of the portfolio;
3. Foreign exchange VaR is originated from foreign exchange risk exposure of the portfolio;
4. Residual VaR is originated from other factors exposure of the Sukuk portfolio.

Foreign exchange risk

A proportion of treasury funding and investment activity is undertaken in foreign currencies, mainly US dollars, Euros and Kuwaiti Dinar. Foreign currency exposure is hedged on the balance sheet to reduce currency exposures to acceptable levels. VaR is used to monitor the risk arising from open foreign currency positions. The Group's Pillar 1 minimum capital requirement allows for foreign exchange risk through the foreign exchange risk requirement.

As at 31 December 2025, the net market value of nominal foreign exchange exposure was £224k (2024: £527k) which generated Foreign Exchange VaR of:

2025	95% VaR (£)
One day	(664)
One week	(1,757)
2024	**95% VaR (£)**
One day	(1,683)
One week	(3,673)

Financial assets at fair value through other comprehensive income - Sukuk Portfolio Risk

As part of liquidity management, the Group's Treasury department invests in selected Sukuk. As at 31 December 2025, the Group has not used derivatives to hedge Sukuk investments. VaR is used to monitor the risk arising from the available-for-sale Sukuk investment portfolio. The Group's Pillar 1 minimum capital requirement allows for investment risk through the equity position risk requirement.

As at 31 December 2025, the market value of nominal FVTOCI Sukuk investment exposure was £38,110k (2024: £28,282k) which generated Price Risk VaR of:

2025	95% VaR (£)
One day	(29,960)
One week	(44,981)
2024	**95% VaR (£)**
One day	(27,635)
One week	(62,024)

Financial assets at fair value through other comprehensive income - Sukuk Portfolio Risk

As part of liquidity management, the Group's Treasury department invests in selected Sukuk. As at 31 December 2025, the Group has not used derivatives to hedge Sukuk investments. VaR is used to monitor the risk arising from the available-for-sale Sukuk investment portfolio. The Group's Pillar 1 minimum capital requirement allows for investment risk through the equity position risk requirement.

Fair value measurements recognised in the balance sheet

The following table provides an analysis of the financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:·

• Level 1: Fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets and liabilities. As at 31 December 2025 and 31 December 2024, Level 1 financial instruments are primarily investments in Sukuk that are quoted in active markets and market bid prices have been applied to fair value these at year end;

• Level 2: Fair value measurements are those derived from inputs other than quoted prices included are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); As at 31 December 2025 and 31 December 2024, the Group did not hold any Level 2 financial instruments; and

• Level 3: Fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data. As at 31 December 2025 and 31 December 2024, Level 3 financial instruments consisted of investments in unquoted equity securities. Fair value is estimated by reference to the net asset value of the underlying investment for unquoted equities, where the net asset value is not based on observable market data. Unquoted equity securities are valued using confirmations of debt and cash balances held via the SPV and third-party appraisal reports. The valuation techniques include net present value and discounted cash flow models, comparison to similar instruments and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark profit rates, and credit spreads. The objective of valuation techniques is to arrive at fair value determination that reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

2025	Level 1 £ 000	Level 2 £ 000	Level 3 £ 000	Total £ 000
Derivative financial instruments				
Derivative financial instruments	2,348	-	-	2,348
Fair value of hedged assets in portfolio hedges of interest rate risk				
Fair value of hedged assets in portfolio hedges of interest rate risk	2,377	-	-	2,377
Financial assets held at fair value through the income statement				
Unquoted equity securities	-	-	2,827	2,827
Financial assets at fair value through other comprehensive income				
Quoted Sukuk	38,098	-	-	38,098
Unquoted equity securities		-	2,415	2,415
Total	42,823	-	5,242	48,065

2024	Level 1 £ 000	Level 2 £ 000	Level 3 £ 000	Total £ 000
Derivative financial instruments				
Derivative financial instruments	11,337	-	-	11,337
Fair value of hedged assets in portfolio hedges of interest rate risk				
Fair value of hedged assets in portfolio hedges of interest rate risk	(371)	-	-	(371)
Financial assets held at fair value through the income statement				
Unquoted equity securities	-	-	8,228	8,228
Financial assets at fair value through other comprehensive income				
Quoted Sukuk	28,282	-	-	28,282
Unquoted equity securities	-	-	2,331	2,331
Total	39,248	-	10,559	49,807

The fair value of financial assets and liabilities at amortised cost approximates their carrying value. There were no transfers between Level 1 and Level 2 during the year and no transfers between Level 2 and Level 3.

Level 3 asset	Carrying value 2025 £ 000	Carrying value 2024 £ 000
Financial assets held at fair value through other comprehensive income		
- KWD Unquoted equity securities	2,415	2,331
Financial assets held at fair value through the income statement		
- UK Unquoted equity securities	2,827	8,228
Total	**5,242**	**10,559**

Reconciliation of Level 3 fair value measurements of financial assets at fair value through other comprehensive income:

	Fair Value Through Other Comprehensive Income	
	2025	**2024**
	£'000s	**£'000s**
Balance at 1 January	2,331	3,070
Total gains or losses:		
In income statement	-	-
In FVTOCI	241	(777)
Purchases	-	-
Issues	-	-
Settlements	-	-
FX retranslation	(157)	38
Transfers out of Level 3	-	-
Transfers into Level 3	-	-
Balance at 31 December	**2,415**	**2,331**

The fair value of financial assets held at FVTOCI would reduce by £241.4k and £155.5k as at 31 December 2025 and 2024, respectively, as a result of 20 % decrease in discount for lack of marketability.

The line item in the Consolidated Statement of Comprehensive Income that includes change in unrealised gains/ (losses) on financial assets through other comprehensive income is 'Gains /(loss) on FVOCI investments'.

Reconciliation of Level 3 fair value measurements of financial assets at fair value through the income statement:

2025	Financial assets held at fair value through the income statement		
	Financing arrangements £ 000	Unquoted equities £ 000	Total £ 000
Balance at 1 January	-	8,228	8,228
Fair value uplifts	-	127	127
Net settlements	-	(5,528)	(5,528)
Balances at 31 December 2025	-	2,827	2,827

2024	Financial assets held at fair value through the income statement		
	Financing arrangements £ 000	Unquoted equities £ 000	Total £ 000
Balance at 1 January	-	18,278	18,278
Fair value uplifts	-	1,291	1,291
Realised gain on sale	-	678	678
Net settlements	-	(12,019)	(12,019)
Balances at 31 December 2024	-	8,228	8,228

A 20% decrease in property prices would reduce the fair value of financial assets held at FVTIS by £0.6m and £1.5m as at 31 December 2025 and 2024, respectively.

The line item in the Consolidated Income Statement that includes change in unrealised gains/ (losses) on financial assets held at fair value through the income statement is 'Net gains from financial assets at fair value through income statement'. The table below describes the effect of changing the significant unobservable inputs to reasonable possible alternatives in relation to financial assets held at fair value through the income statement unquoted equity securities:

	2025		2024	
Unobservable inputs	5% Favourable Change £ 000	5% Unfavourable Change £ 000	5% Favourable Change £ 000	5% Unfavourable Change £ 000
Net Rental Yield	1,088	(984)	696	(630)
Market Rents	1,027	(1,027)	661	(661)
Stabilised Operating Leakage	251	(251)	166	(166)
Portfolio Transaction Costs	23	(23)	15	(15)
Total	2,389	(2,285)	1,538	(1,472)

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes or systems, human factors, or from external events. Major sources of operational risk include: operational process reliability, IT security, outsourcing of operations, dependence on key suppliers, implementation of strategic change, integration of acquisitions, fraud, operational error, customer service quality, regulatory and legislative compliance, recruitment, training retention of staff and social and environmental impacts.

Ongoing assessment of operational risks occurs through the analysis of risk events, internal audit findings, external events and key operational risk indictors. Relevant operational risk management information is recorded in a dashboard that is prepared and presented monthly to the Executive Risk Committee, and quarterly to the Board Risk & Compliance Committee.

Pillar 3 Disclosures (Unaudited)

Pillar 3 disclosures are presented in the "Pillar 3 Disclosures" document, available on request. The disclosures are made annually and are published as soon as practicable after the publication of the annual report and financial statements of the Group.

Capital risk management (unaudited)

The Group policy in respect of capital adequacy is to maintain a strong capital base so as to retain investor, creditor and market confidence. During the year, capital has been maintained at a level above minimum regulatory requirement. Such levels have been established by reference to an Internal Capital Adequacy Assessment Process (''ICAAP'') assessment. The PRA reviews the ICAAP assessment of its Pillar 2 capital requirement as part of the Total Capital Requirement (TCR) process.

The Bank holds its cash with a number of reputable financial institutions. All cash and cash equivalents are short-term, highly liquid investments that are readily convertible into known amounts of cash.

The Bank's capital requirements are set and monitored by the regulator. Regulatory capital consists of Tier 1 capital, which includes ordinary share capital and retained earnings less intangible assets, and Tier 2 capital.

The Bank's regulatory capital position was as follows:

	2025 £ 000	2024 £ 000
Core Tier 1 Capital		
Share capital	150,049	150,049
Retained losses	(36,644)	(24,352)
Add back of IFRS 9 impairments due to transitional arrangements	-	-
Other Reserves – FVTOCI	(3,615)	(4,378)
	109,790	121,319
Deductions from CET1	(17,609)	(12,736)
Tier 2 Capital	18,939	18,500
Total regulatory capital	111,120	127,083

38 Non adjusting events after the financial period

There were no material events subsequent to 31 December 2025 and up until the authorisation of the financial statements for issue, that have not been disclosed elsewhere in the financial statements except the sale of GBTRG which was completed on 31 March 2026. The disposal resulted in a gain of approximately £12million.

The Group continues to closely monitor the evolving Middle East conflict. Based on current assessments, no material impact from the conflict has been identified in respect of the Group's exposures or its business activities.
